

# DevOps Engineer – 2016DOE1

## Position Description

Η Regate επενδύει σε νέα προϊόντα τα οποία σχεδιάζονται και υλοποιούνται με τις πιο σύγχρονες τεχνολογίες. Η high-tech ομάδα της Regate λειτουργεί με Agile πρότυπα, με virtual teams σε Ελλάδα και εξωτερικό (Λονδίνο, Βρυξέλλες, κλπ) με σκοπό την υλοποίηση web services και micro-services με τις προαναφερόμενες τεχνολογίες.

## Key Responsibilities

- Ensure security, performance and high availability of all environments by applying Infrastructure as Code principles.
- Enabling deployment to cloud and on premise environments.
- Create automated Infrastructure administration workflow capabilities by removing bottlenecks and inefficiencies
- Continuously look for opportunities to improve upon the development and build capabilities in the team.

## Position Requirements and Skills

3+ years' experience in Linux Administration and Cloud environments

- Experience with LAMP stack applications or similar variations. MEAN stack would be a bonus.
- RedHat (preferred) and/or Ubuntu administration.
- Good scripting skills in bash and one of Python/Ruby/PHP/Javascript.
- Experience with Virtualisation e.g. VMware and public Clouds e.g. AWS. Docker would be a bonus.
- Familiar with Agile development lifecycle and practices- TDD, CI/CD
- TCP/IP and network administration
- AWS and CloudFormation. Terraform would be a bonus.
- Puppet or Chef/Ansible/Saltstack etc
- Jenkins or other CI tools.
- Knowledge of RDBMS e.g. MySQL. Familiarity with NoSQL Databases e.g. OrientDB would be a bonus.
- Any experience with administering Solr or ElasticSearch and RabbitMQ or similar would also be welcome.
- Good command of the English language.
- Military Service must be completed.
